https://www.nmapiarytour.org/ABQ

The 2018 ABQ Area Pollinator and Garden Tour is September 22nd from 9:30 AM to 3:30 PM. This tour will be highlighting fall bloom.

The following listing is courtesy of
Santa Fe Native Plant Project
Santa Fe Master Gardener Association
Santa Fe, New Mexico

Please see their complete list with complete information at
https://tinyurl.com/ya2uhd92

The plants listed are all native to New Mexico.

FROM SFMGA:

“Why native plants? Native plants have evolved over eons in a specific environment. As a result, they have adapted to a particular set of growing conditions, including soil type, moisture levels, fluctuations in temperature, competitors, and pollinators. Many native plants will flourish without soil amendments or supplemental water once established in the landscape.”

Annuals/Biennials for Fall
(Annuals live only one year, Biennials bloom and die in the second year.)
